

Competitive Drive

Competition spurs me to innovate. I thrive in competitive environments, as I can strengthen my work after viewing others'. Quants must compete with other quants to find the alpha. My ability to induce competition will motivate me to always try to find the alpha first.

Optimistic Personality

I have a self-motto: Always Smile. Through setbacks, I always build up the courage to push through and continue whatever task I was pursuing. The stock market's high volatility can not be avoided, and many times hours of work could be deemed useless if the market recedes. Thus, quants must always stay optimistic towards their work.

Pranay Rajpaul: Special Skills Data Sheet

Innovative Mindset

I love reading about new technology and working to learn the new methods as they rise in popularity. My innovative mindset will help me adapt to any future technology that arises to assist quants, such as artificial intelligence through machine learning.

Critical Thinking/ Decision Making

I have been placed in many situations where a spontaneous decision by me must decide the success of an idea. I have adhered to coming up with creative and successful spontaneous decisions after quickly analyzing the circumstances for any conflict. This skill is highly anticipated for all successful quants to have. faster/smoothen, which leads to a greater production output.

Time Management

I am very time oriented, as I must complete my tasks within a scheduled time. I will complete any task done before its due, sometimes finishing projects the day it was assigned it. I also make it custom to arrive at least 5 minutes early to any meeting. My time management will come in perfect use during long work hours as a quant, so I can be as productive as possible while working.
